Monash University signs on for DUG McCloud

16 December 2022

DUG Technology Ltd (DUG) is pleased to announce that it has signed a two-year agreement with Monash University, Monash eResearch Centre (Monash) to provide high performance computing (HPC) services including compute and storage using DUG McCloud.

As part of the agreement, Monash will make a prepayment of A\$400,000 (ex GST) towards on-demand HPC services provided over a contract term of 24 months.

This partnership between DUG and Monash, the largest university in Australia, further cements the important role HPC will play in the tertiary education sector.

DUG has already signed agreements or MoUs with the Australian National University, Curtin University, the University of Western Australia, Edith Cowan University, Australian Catholic Universities and Imperial College London to provide the world-class HPC needed to turbocharge research and innovation.

Commenting on the agreement, Managing Director Dr Matthew Lamont said: *“We are incredibly excited to be working with Monash. This partnership will provide Monash with DUG’s industry-leading HPC services and will support researchers as they innovate and seek to commercialise their ideas.”*

Dr Slava Kitaeff, Associate Director Monash eResearch Centre said: *“The demand for HPC at Monash is growing fast. It is vital that we are able to support the university research community with HPC resources. This acquisition results from the collaboration between Science, Engineering and eResearch Centre. We are looking forward to working with the talented team at DUG.”*

About DUG

DUG is an ASX listed technology company, headquartered in Australia, that specialises in analytical software development and reliable, green, high-performance computing (HPC). The company is built on a strong foundation of applied science and a history of converting research into practical, real-world solutions. DUG delivers innovative software products and cost-effective, cloud-based HPC as a service backed by bespoke support for technology onboarding. DUG's expertise in algorithm development and code optimisation enables clients to leverage big data and solve complex problems.

DUG is a global company with offices in Perth, London, Houston and Kuala Lumpur, supporting a diverse industrial client-base that includes radio-astronomy, biomedicine and meteorology, as well as the resource, government and education sectors. DUG designs, owns, and operates a network of some of the largest and greenest supercomputers on Earth. The company continues to invest and innovate at the forefront of software and HPC, working towards a climate-positive future.
