

# Barrow-Exmouth advanced 3D PreSDM seismic reprocessing with FWI imaging

## BEX MC3D advanced 3D PreSDM seismic reprocessing with FWI imaging

### Project overview

One seamless 3D seismic dataset

Incorporates 6 legacy 3D surveys using DUG's advanced broadband PreSDM workflow with FWI imaging

Located over an area that has:

- Australia's largest gas reserves – 3 LNGs
- Many undeveloped fields
- Significant exploration upside potential

BEX MC3D designed for:

- Basin scale and prospect/field specific evaluations
- Infrastructure-led exploration and development
- Increasing Australia's gas reserves
- Addressing growing LNG demand
- Identifying proximal CCUS projects
