

PETREL MC2D MULTI-CLIENT SURVEY

Petrel Sub-basin 2D PreSDM seismic
reprocessing with FWI imaging

Petrel MC2D PreSDM seismic reprocessing with FWI imaging

Project overview

Petrel Sub-basin regional 2D reprocessing

DUG's advanced broadband, PreSDM workflow with FWI imaging

Incorporates: AGSO 100R, 116A and 118B legacy data

19 lines totaling 5,550 km

Regional basin-wide 2D seismic grid across the Petrel Sub-basin and Malita Graben

Ties key wells, oil and gas fields, sparse 3D surveys and provides a consistent high-quality reference 2D seismic dataset multi-purposed for both petroleum and CCUS evaluations
