

# NOVAR MC3D MULTI-CLIENT SURVEY

North Vulcan Sub-basin advanced 3D PreSDM  
seismic reprocessing with FWI imaging

## NOVAR MC3D advanced 3D PreSDM seismic reprocessing with FWI imaging

### Project overview

One seamless 3D seismic dataset

Incorporates 10 legacy 3D surveys using DUG's advanced broadband PreSDM workflow with FWI imaging

Located over an area that has:

- Cash/maple multi-TCF gas/condensate field development
- Many undeveloped discoveries
- Significant exploration upside potential

NOVAR MC3D designed for:

- Basin scale and prospect/field specific evaluations
- De-risking exploration and development
- Increasing Australia's oil and gas reserves
- Identifying proximal CCUS projects
