DUG NOMAD 10

DUG Nomad 10 is a mobile, plug-and-play data centre, delivering IT heat rejection of over 2 kW per RU. Engineered for rapid deployment and simple operation, the rugged design makes it the ideal solution to bring AI / HPC workloads to edge, remote, or integrated environments.

SPECIFICATIONS

- 26 RU of immersed hardware
- Up to 80 kW IT heat rejection
- Remote-switch, IPMI-enabled PDUs that are UL / CE / RoHS compliant
- Deployment mass 9,921 lbs / 4,500 kg
- Supply power of 150 kW, 400 ± 5% V, 3 phase, 50 or 60 Hz

DIMENSIONS

- Length 9.8 ft (2,980 mm)
- Width 8 ft (2,440 mm)
- Height 9.5 ft (2,900 mm)

FEATURES

- Self-contained solution with in-built cooling infrastructure, just add power
- Insulated and sealed single-phase immersion cooling tank, with dual fluid-control modules
- IP67 Marechal DS9 Decontactor™ and extension lead
- Powered hoist, zone lighting and general purpose outlets
- Starlink compatible for remote connectivity
- Compatible with infrastructure monitoring systems for remote management
- Engineering and manufacturing leverages DUG's decade plus of immersion cooling experience
